SUMMARY

AI Solutions Architect and Product Builder. I design and build the systems that take operations out of spreadsheets, and most of them now have AI inside. I bring **14 years** across operations, Customer Success and e-commerce at IBM, VTEX and Vision Marine Training, so I know which problem to solve before writing the first line of code.

Today I own **five digital products end to end** at Vision Marine Training, from discovery to production, under a “you build it, you run it” mindset. That includes an **AI agent with tool use, RAG** over internal documents and an **API designed for an AI sales agent on WhatsApp**. I work as an **AI agent orchestrator**: I break problems down, delegate to AI coding agents and ship tested increments, and I measure the outcome: **200+ hours of manual work automated per year**.

EXPERIENCE

VISION MARINE TRAINING Rio de Janeiro, Brazil · maritime and offshore training center

AI Solutions Architect & Product Builder

Apr 2026 – Present

- Own **five internal products end to end**: discovery with operations teams, AI-assisted prototyping, specs, build, launch and run. Digital certificates with QR validation and e-signature, inventory and purchasing, an 85-screen corporate portal, an offline training simulator and a satisfaction dashboard.
- Built an **AI agent on Claude with 8 tools** (tool use) over company data (classes, students, CRM deals, KPIs and documents), with voice input and **LLM usage and cost governance** by model and by person. Document answers use **RAG** with PII masking (LGPD) and permission-aware retrieval.
- Designed the **public API consumed by an AI sales agent on WhatsApp** (conversational commerce), with contract rules written for an LLM consumer: ranking as a business rule, no dead-end errors, no ambiguous nulls and no contradictory signals.
- Designed and built training-management modules (certificate tracking, pre-course emails, weekly access lists, assessments with auto-proctoring) that automated **4–10 hours of manual work per week: 200+ hours per year**.
- **Technical product counterpart** to the external agency building the learning platform (website, checkout, LMS): requirements, backlog prioritization, acceptance criteria and QA. **85+ merged deliveries and 75+ tasks in six weeks**.
- **Run what I build**: scheduled syncs (Pipedrive CRM every hour, e-signature status), role-based access and audit trails, and live observability of the team’s AI coding-agent sessions.
- Orchestrate **AI coding agents (Claude Code)** with custom skills and hooks, MCP servers and persistent agent memory. Write requirements, architecture docs and API specs iteratively with AI, and ship every release through TDD and E2E tests.

Operations Lead

Aug 2025 – Mar 2026

- Drove **LMS and digital platform adoption** for B2B clients: onboarding, configuration and continuous usage monitoring.
- Implemented **customer health monitoring** (satisfaction surveys, dashboards and KPIs, with visualization automated in Looker Studio) to anticipate risk and reduce churn.
- Bridged operations and the external development agency: requirements, bug validation (QA) and UX improvements.
- Trained **6+ team members** on Pipedrive CRM and internal tools.

Customer Success Specialist & Post-Sales Executive

Jun 2024 – Aug 2025

- Managed B2B and B2C accounts end to end (needs discovery, pricing, custom training schedules and post-sale), reporting results and insights **directly to the CEO**.
- Created automations and standardized formats that streamlined internal processes and reduced operating costs; designed and analyzed satisfaction surveys to drive service improvements.

VTEX Brazil · global commerce platform

Business Development Manager

May 2023 – Aug 2023

- Identified growth segments and strategic partnerships; built proposals and negotiated deals with marketing, legal and finance.

Customer Excellence Manager

Aug 2022 – May 2023

- **Led a customer support team**: service standards, performance metrics (customer satisfaction, resolution time) and team development.
- **Bridged support and the Product team**, with platform problems validated and documented as known issues.
- Led product adoption and account expansion strategies: renewals, upsell and churn reduction.

Customer Excellence Analyst

Sep 2021 – Aug 2022

- Handled enterprise customers’ support tickets, investigating and solving each problem; when the root cause was the platform, validated and documented the **known issue** with the Product team.
- Advised and trained customers on platform configuration, workflows and integrations (Retail, Marketplace and Omnichannel), turning technical changes into clear guidance.
- Monitored engagement and **Customer Health Score**, analyzing usage and conversion data to anticipate risk.

IBM Brazil

Accounts Receivable Analyst (Colombia portfolio)

Oct 2018 – Mar 2021

- Built **SQL queries** (QMF) on billing systems to get real-time invoice data for Colombia, and trained colleagues on the tool.
- Improved overdue receivables by **55% in year one and 76% over two years**, meeting every corporate target; recognized twice by the regional manager.

CORPORACIÓN DIGITEL Venezuela · telecommunications

Sales & Customer Service Specialist

May 2012 – Apr 2018

- Grew sales **36%** by creating a new sales and service channel through external authorized agents.

EDUCATION

Full Stack Development (Node.js, Express, Sequelize), Toti

Jul 2026 – Dec 2026 · in progress

Bachelor’s in Business Administration, Universidad Católica Andrés Bello (Caracas, Venezuela)

2009 – 2012

CERTIFICATIONS & COURSES

- **ISO 9001:2015 Internal Auditor** · FM2S, 2025
- **Customer Experience Fundamentals** · Track.co, 2024
- **Digital Commerce Expert** · EICOM Institute, 2023
- **Artificial Intelligence Career** · EXAME, 2023
- **Commerce Management Certification, Level 1** · EICOM Institute, 2023
- **E-commerce Conversion Optimization** · ComSchool, 2023
- **The 3 Pillars of a Product Career** · Gama Academy, 2022
- **CX Bootcamp** · 2022
- **Full Stack** · Toti, 2021
- **Hiring Coders Program** · Gama Academy, 2021
- **Project Management Fundamentals** · LinkedIn, 2021

SKILLS

Product: lean discovery · product vision and metrics · roadmap · backlog prioritization · requirements and documentation · Design Thinking · Customer Journey Mapping

AI: AI agent orchestration (Claude Code) · LLM applications (tool use, RAG) · prompt and context engineering · MCP · LLM cost governance

Technical: REST APIs · webhooks · SQL (PostgreSQL) · TypeScript · Next.js · Node.js · Supabase · integration flows · TDD · E2E testing (Playwright)

Data: KPIs · dashboards · Looker Studio · customer health metrics

Tools: VTEX platform · Pipedrive · Git · Vercel
